Desarrollo de aplicaciones móviles

Adrián Alberto Alvarez Cordoba

Software Engineer | Android Developer | Kotlin | Jetpack Compose |
Clean Architecture | KMP | MVVM | REST APIs | Firebase
Colombia

Summary

I am Adrián Alvarez, a Software Engineer specialized in native Android application development. I am passionate about building efficient, scalable apps with a strong user experience using the modern Android ecosystem. My main tech stack is Kotlin + Jetpack Compose, applying solid architectures such as MVVM and Clean Architecture, with local data management using Room, REST API consumption with Retrofit, dependency injection with Hilt, and asynchronous programming with Coroutines and Flow. What sets me apart: I combine strong technical skills with a product-oriented mindset — I don't just write code, I design solutions with the end user in mind.

Experience

Freelance | Self-Employed

Desarrollador de software

August 2021 - Present (4 years 10 months)

Medellín

As an independent mobile developer, I have worked on the design and development of native and cross-platform Android applications, taking projects from the initial idea to publication on app stores.

My main contributions have been:

Development in Java and Kotlin, applying MVVM and Clean Architecture for scalable solutions.

Advanced use of Android SDK, Jetpack, Gradle, and modern libraries.

Integration with REST APIs and JSON, efficiently connecting applications with backend services.

Collaboration within teams using Git and agile workflows.

Implementation of modern and functional interfaces with Jetpack Compose and Flutter.

Webhelp

Asesor soporte tecnico

February 2021 - March 2024 (3 years 2 months)

Medellín

Target Medios

Junior Web Developer

August 2020 - August 2021 (1 year 1 month)

Medellín

Collaborated with designers to create clean interfaces, as well as simple and intuitive interactions and user experiences.

Developed project concepts and maintained an optimal workflow.

Worked closely with different teams using the GIT tool, following agile methodologies and ensuring timely project deliveries.

Participated in the full-stack development of applications using HTML5, NodeJS, React, and Kotlin, resulting in the successful delivery of 5 major web projects and a direct Android application for company inventory management.

Implemented continuous improvements in software performance and integrated unit testing with JUnit and Espresso, leading to a 5% reduction in production errors.

Managed relational databases such as MySQL, SQL Server, Room, and SQLite, optimizing queries and stored procedures that improved database performance by 10%.

Education

Politécnico Grancolombiano

Engineer's degree, Computer Engineering · (July 2023 - July 2027)

Politécnico Andino Iberoamericano

Técnico laboral por competencias en desarrollo de aplicaciones móviles app 's y desarrollo web. · (January 2020 - August 2021)

Ubicua Ingenia Udea

Desarrollador de Videojuegos · (August 2021 - February 2022)
